

About the Journal

Aims and Scope

Srinakharinwirot Science Journal is a peer-reviewed journal and freely available online, published in two issues per year by the Faculty of Science, Srinakharinwirot University. The journal publishes the original research articles or review articles and all contributions are accepted only in English. The journal aims to provide a platform for exchange and distribution of the knowledge in all areas of science and related fields. All articles considered for publication in this journal must not be previously published in other journals or simultaneously submitted for publication elsewhere. All manuscripts are welcomed and can be submitted as a single Word file online via the website: <http://ejournals.swu.ac.th/index.php/ssj/>.

Peer Review Process

The journal uses **double-blind review** with both the reviewer and the author are concealed from each other. For the manuscripts submitted from January 2022, peer-review process will be performed by three reviewers who are expert in the relevant fields.

Publication Frequency

Srinakharinwirot Science Journal is published in two issues per year (issue 1: June and issue 2: December).

Message from the Editor

Srinakharinwirot Science Journal (SWU Sci J) is a peer-reviewed journal published twice a year; June and December. Toward this issue, SWU Sci J has launched original research articles and review articles for 38 years. The journal is indexed in ASEAN Citation Index (ACI) and Thai-Journal Citation Index (TCI 1) which provides a forum for the dissemination of research in all fields of science and science education.

On behalf of our editorial board, I would like to express my gratitude to our readers, contributors, authors, and anonymous reviewers, who have contributed to improve the quality of the journal. My ultimate goal as an editor is to make the journal to achieve higher standard. To date, our editorial team have been working to improve the quality of the journal. Developments of the journal include converting the journal to an English journal in 2021, and having three reviewers for each manuscript in 2022. For the next year, 2023, as our mission, we promise to continue improving the quality of the journal to international standard. We are pleased to welcome all submissions for future issues.

Finally, I am thankful for the editorial team, who have relentlessly worked to carry the journal toward international journal as our ultimate goal.

Associate Professor Apinya Chaivisuthangkura, Ph.D.
